Ref No. : SCSMCOE / 2022 - 2023 / 692

Date : 26 / 11 / 2022

To,
The Plant Manager,
Greenko Wind Power Plant,
Ahmednagar

Subject - Permission to visit at your Wind Power Plant.

Respected Sir/Madam,

Shri. Chhatrapati Shivaji Maharaj College of Engineering, Ahmednagar is established in year 2011 by Ahmednagar Jilha Maratha Vidya Prasarak Samaj, Ahmednagar. The college is approved by AICTE, New Delhi, Recognized by DTE, Mumbai and affiliated to University of Pune and NAAC accredited B++ Institution, Pune. The college runs four branches of engineering viz. Civil Engineering, Computer Engineering, E&TC Engineering and Mechanical Engineering.

As per the curriculum of Savitribai Phule Pune University, a visit to Plant site with Electronic/Electrical Panels is mandatory for the student of Second year to Final year Engineering.

I kindly request you to permit our 50 Second to Final year E&TC Engineering student for visit to your Wind Power Plant. Our two staff members will also accompany them. You are also requested to spare technical person to give information about Greenko Plant.

Your help in this regard is highly appreciated. Thanking you in anticipation.

Yours Truly,

Y. R. Kharde

Industrial Visit Report to Greenko Wind Power Plant

Our Department had organized an Industrial Visit for the Students of S.E, T.E. & B.E Electronics & Telecommunication Department to Greenko. The Visit was organized on 28/11/2022 at Greenko Wind Power Plant, Deogaon Ahmednagar.

Greenko specializes in the full spectrum of wind power solutions with an extensive portfolio of reliable and technologically advanced projects. With operational wind farms strategically located in places with highest wind potential, Greenko's turbines and modules are precisely engineered to yield maximum energy and optimized wind farm performance adapted to diverse operating conditions. With Wind energy being the fastest growing power source in India, the group is actively contributing to the country's transition from fossil fuel dependency to clean energy generation.

The Industrial Visit was in one Session:-

The working and power generation and distribution of the same was explained in details by Mr.Mahesh Sakure Sir.

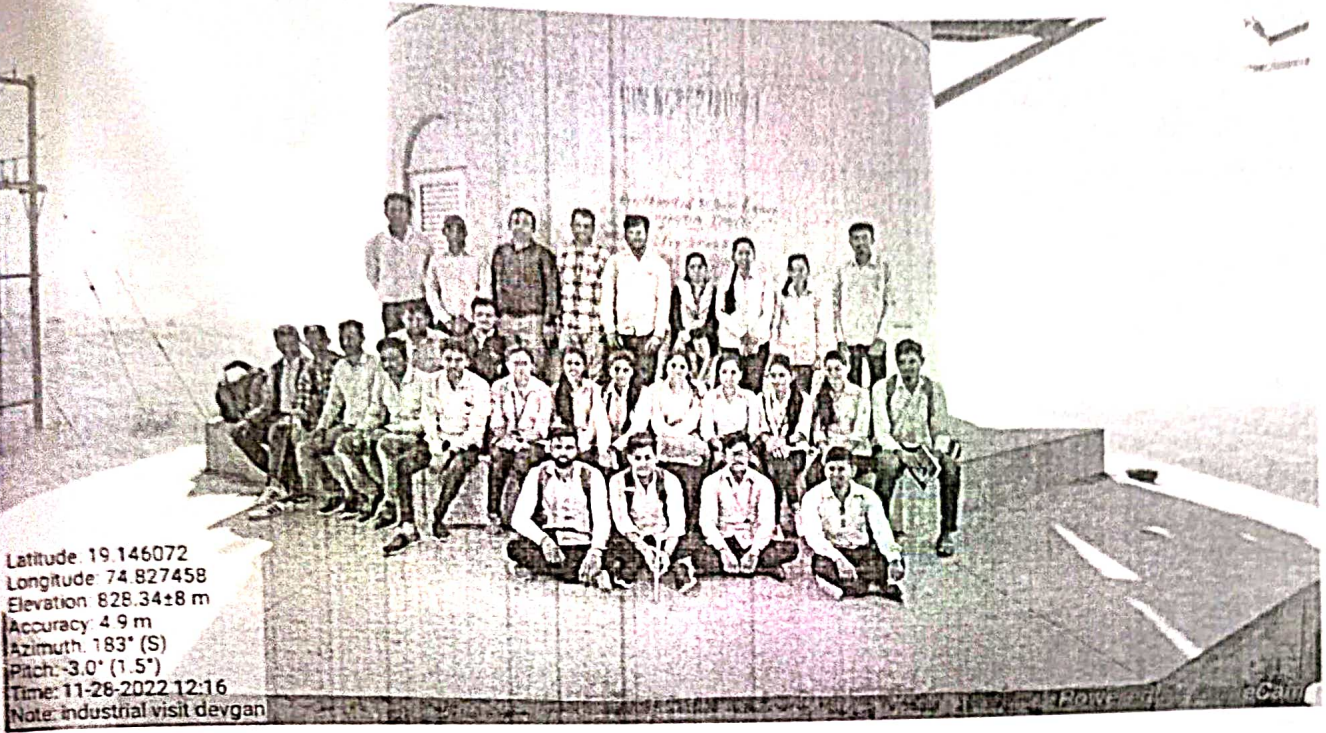

3.Outcome :-

- i.Student's Queries were solved
- ii.Students got an deep acquaintance of the real Energy generation process in wind meal.
- iii.Students were motivated to work in various core industries.

Industrial Visit Report

Name of the Company :- Digital Ion Zone TCS

Number of Students :- 25

Our Department had organized an Industrial Visit for the Students of S.E, T.E. & B.E Electronics & Telecommunication Department to TCS. The Visit was organized on 13/12/2022 at Digital Ion Zone TCS, Hadapsar, Pune.

TCS iON Digital Exams Solution digitizes and automates end-to-end University and Board Examination Processes. It enables the secure creation and Distribution of Question Papers. The solution reduces administrative efforts and costs by automating processes such as Student registration, Exam center allocation, Hall Ticket issuance, Question Paper Logistics Planning, Exam-day Management, and Results Management.

Ion Digital Zone in Ramteki, Hadapsar, Pune is one of the leading Businesses in the Online Examination Centres. Computer Networking and Training Institutes.

The Industrial Visit was in Two Sessions:-

1. A Seminar was arranged in Two Sessions & the following Concepts were explained in brief.

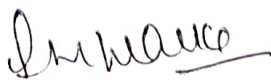

- Networking Systems, Types of Network & it's Topology
- Procedure for Candidate for Examination
- Switches & Routers
- Details of TCS's iON Operating System
- Lastest Trends in I.T Sectors for Freshers as a Job Profile

2. Students were divided in Sections to visit their Server Room and their different Examination Centres.

3. Outcome :-

- i. Student's Queries were solved
- ii. Students got an deep acquaintance of the real time processes in Industry.
- iii. Students were motivated to work in various Software Fields in Corporate.
- iv. Links will be sent to Register Students for making a Career in TCS.

Letter of Thanks

To,

Digital Ion Zone TCS,

FWXC+G7M, Ramtekdi Industrial Area,

Hadapsar, Pune,

Maharashtra 411040

Dear Sir / Mam,

It was really a great privilege to have to visit at Digital Ion Zone TCS which was held at Digital Ion Zone TCS, Ramtekdi Industrial Area, Hadapsar, Pune, and Maharashtra 411040 on 13/12/2022. I would like to express my gratitude for your valuable Knowledge and presentation on "Computer Network Technology and Job Opportunities". Your valuable guidance had helped us in past and they would help us in future as well. On behalf of the all the faculties of the department, I greatly appreciate your work.

I hope for the same co-operation from you in near future course of the time.

Thanking you.

Yours faithfully,

Dr. Y. R. KHARDE

Subject – Regarding Permission for industrial visit at your Cold storage Plant.

Respected Sir,

Shri. Chhatrapati Shivaji Maharaj College of Engineering, Ahmednagar is established in year 2011 by Ahmednagar Jilha Maratha Vidya Prasarak Samaj, Ahmednagar. The college is approved by AICTE, New Delhi, Recognized by DTE, Mumbai and affiliated to University of Pune, Pune. The college runs four branches of engineering viz. Civil Engineering, Computer Engineering, E&TC Engineering and Mechanical Engineering with intake of 60 students each.

As per the curriculum of Savitribai Phule Pune University, a visit to Cold storage Plant Under the subject of Heating, Ventilation & Air conditioning is mandatory for the student of final year Mechanical Engineering.

I kindly request you to permit our 48 Final year Mechanical Engineering student for visit to your Cold storage Plant. Our two staff members will also accompany them. You are also requested to spare technical person to give information about Cold storage Plant.

Your help in this regard is highly appreciated. Thanking you in anticipation.

Omni

Yours Faithfully,

Y.R. Kharde

- 2) M.A.Thombare

Wheel balancing is something which is strictly concerned with the wheel and the tyre correlation. It refers to correcting the imbalance between The weights of the wheel and the tyre. Balancing is always done alongside wheel alignment to keep the weight and alignment coordination in sync.

Maintaining a balanced weight in the wheel/tyre combination is significant for a smooth and stable drive, less tyre wear and eliminating vibrations. Unbalanced tyres increase the risk of wheel and suspension damage massively.then been known name in its field. The business strives to make for a positive experience through its offerings.

How is misalignment corrected?

Misalignment happens when the angle of the tyres of your ride is off from the linear position they are in. So to correct it, the technician is majorly concerned with three aspects:

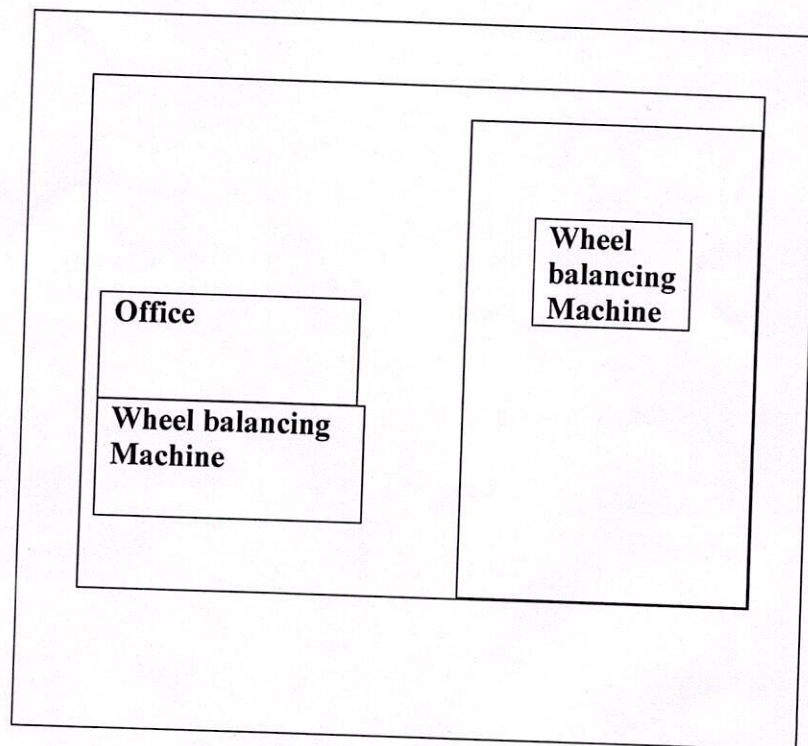

Caster angle: It is the angular displacement between the steering's axis and the vertical axis of the wheels being steered. This is concerned with maintaining stability and balance while steering the car. The mechanic tends to find the fine balance bet positive caster angle and negative caster angle to correct misalignment.

Camber angle: it is concerned with mending the angular proportions between the wheels vertical axis and the vertical axis of the car when viewed from the front.

Toe Angle: this is the angle which the tyres make while moving outwards or inwards with the longitudinal axis of the vehicle when viewed from a top angle.

Once all the three angles get back in sync, the suitable wheel alignment is achieved.

To,

The Manager,
Sahib Cold Storage,
MIDC, Ahmednagar.

Subject – Regarding Permission for industrial visit at your Cold storage Plant.

Respected Sir,

Shri. Chhatrapati Shivaji Maharaj College of Engineering, Ahmednagar is established in year 2011 by Ahmednagar Jilha Maratha Vidya Prasarak Samaj, Ahmednagar. The college is approved by AICTE, New Delhi, Recognized by DTE, Mumbai and affiliated to University of Pune, Pune. The college runs four branches of engineering viz. Civil Engineering, Computer Engineering, E&TC Engineering and Mechanical Engineering with intake of 60 students each.

As per the curriculum of Savitribai Phule Pune University, a visit to Cold storage Plant Under the subject of Heating, Ventilation & Air conditioning is mandatory for the student of final year Mechanical Engineering.

I kindly request you to permit our 48 Final year Mechanical Engineering student for visit to your Cold storage Plant. Our two staff members will also accompany them. You are also requested to spare technical person to give information about Cold storage Plant.

Your help in this regard is highly appreciated. Thanking you in anticipation.

Yours Faithfully,

(Signature)

- 2) R.V.Rajale

Being the second largest producer of fruits and vegetables in the world, India touches the production of approximately 260 million metric tons annually India is also the world's largest producer of milk and fruits. Still the nation witness nearly 4.6-15.9% wastage is due to lack of cold storage infrastructure.

Objective of cold storage:

- Prolonging Shelf life of fruits and vegetables.
- Temperature control
- Cost effective
- Transportation of products
- Storage for chemicals. And many more

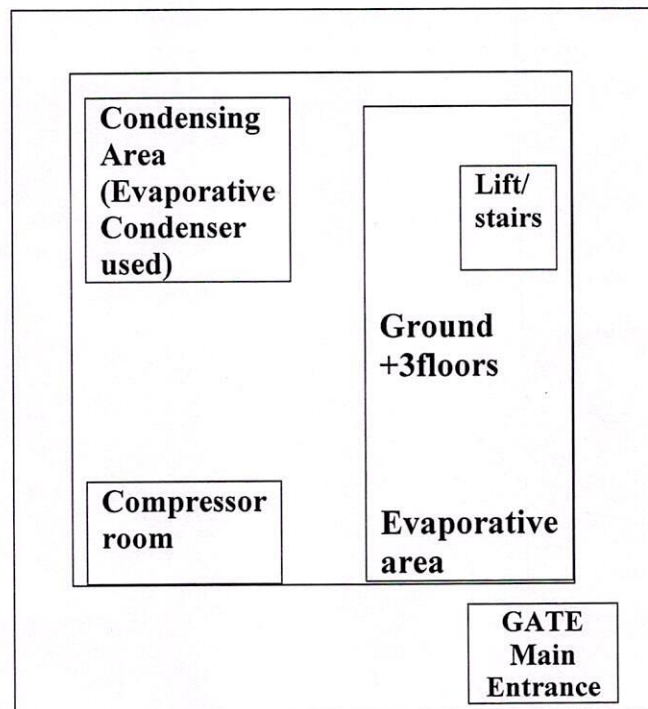

Sahib ice and cold storage in Ahmednagar, is known to satisfactorily cater to the demands of its customer base. The firm came in to existence in 2013 and has, since

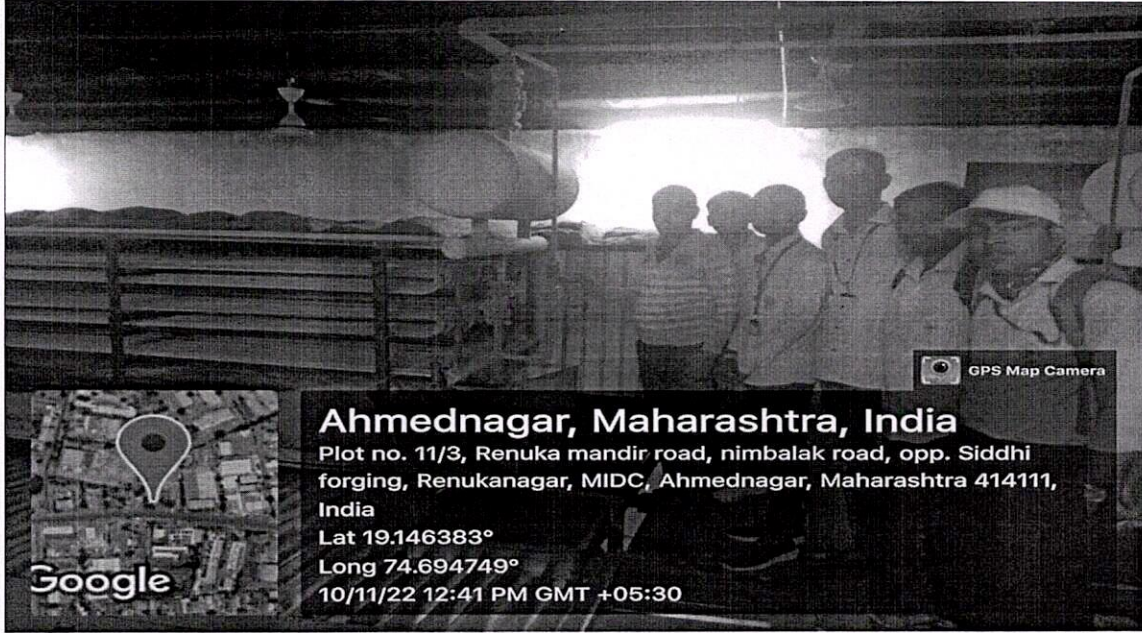

then been known name in its field. The business strives to make for a positive experience through its offerings.

Sahib cold storage is popular cold storage in Ahmednagar Maharashtra. Cold storage is a facility in which fruits and vegetables can be preserved for a longer duration. The cold storage are categorized for two types, first is used for single product and the other is for multiple products. Food item that required cold storage include fruits and vegetables, poultry and fish products, meat product etc. Mostly potato stored in the storage space in big amount generally there shelf life for storage is about 6 to 8 months. Sahib cold storage has three floors. Compressor placed at ground and evaporator, condenser is exactly besides the compressor room. In this plant medium temperature cold storage adopted which is designed for storing a variety of product at 0 to 8 degree Celsius temperature. As number of floors are there to carry goods elevators are also available. Customer centricity is at the core of Sahib Ice & cold storage.

AIM

Visit to Pumping Station and Water treatment plant.

PROBLEM STATEMENT

To understand working of water treatment plant and pumping station.

Theory:

Pumping stations in a water distribution system are necessary where water is pumped directly into the system (e.g. from a lake) or where pressure has to be increased because there is an insufficient difference in water levels in gravity flow distribution systems. There are two general types of pumps: vertical turbine pumps and centrifugal pumps. Capital costs are high, but the most expensive part is the energy supply for pumps (mostly electrical). Therefore, it is very important that pumps have a high degree of efficiency and are maintained properly. To guarantee safe water quality, cross connection of drinking water and waste removal systems must be avoided.

Water Treatment Plant detail information:

The water treatment plant get raw water from mula dam at since the water is gone under aeration process which is removal & inclusion of O_2 is done than as the it gone through

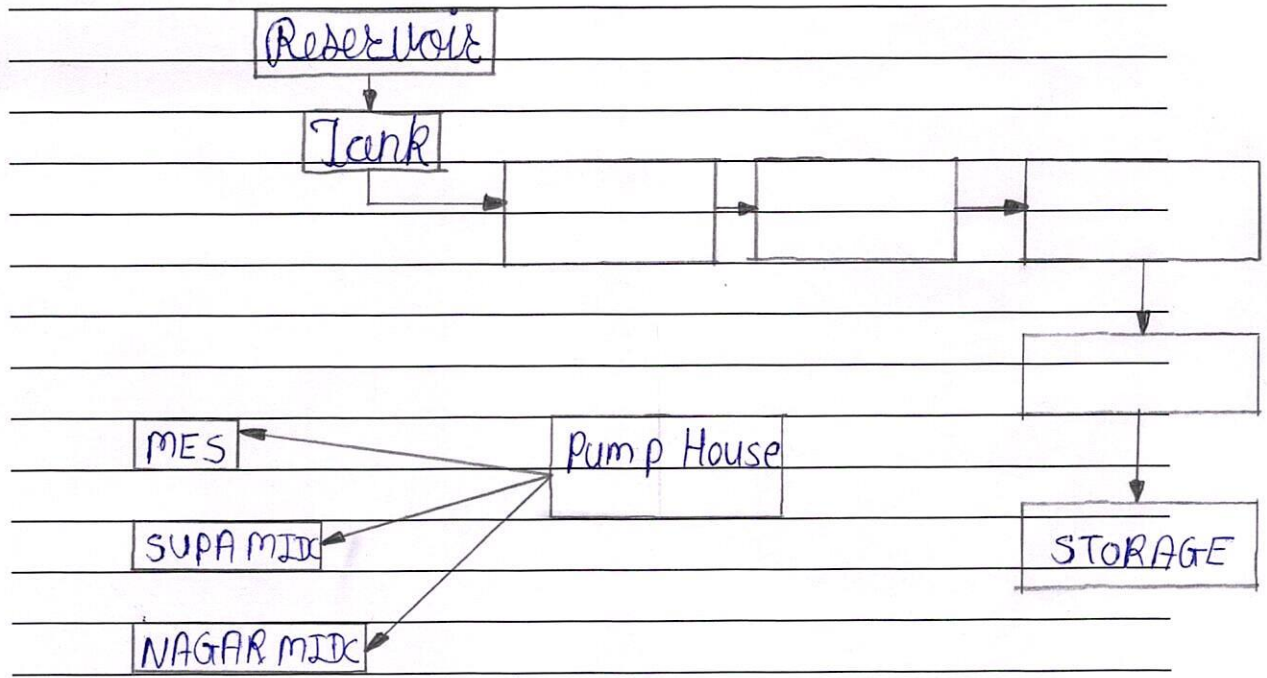

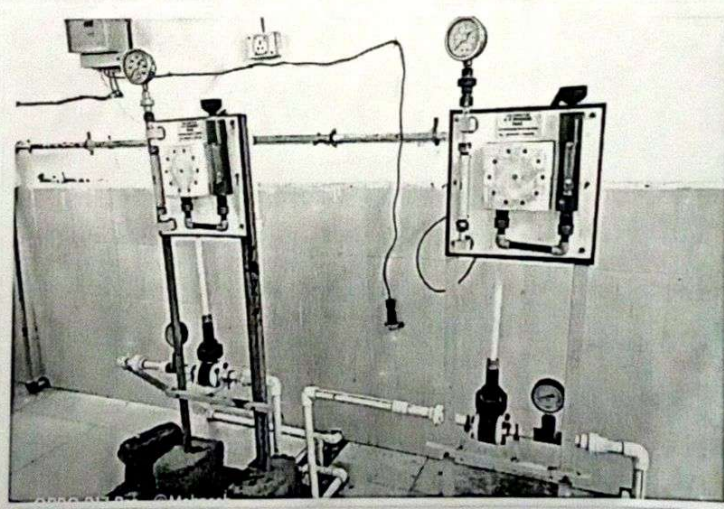

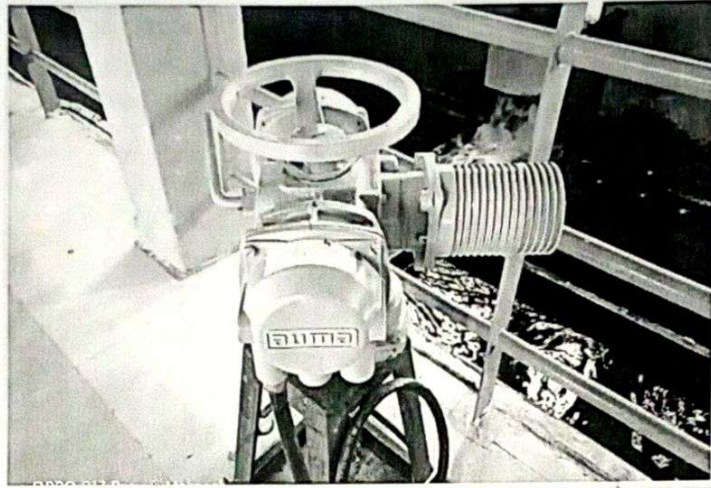

sedi mentation in week upto 3 & had to remove diet then gravitational situation.

Water Pumping Station detail information:

The water pumping station of the pumps at 5 of 50HP & 2 of 20HP the 200HP pump the water to deliver water to the pump house & remaining used to deliver the water to now fill the head of near by MIDC.

Process in Water treatment and pumping station (flow diagram):

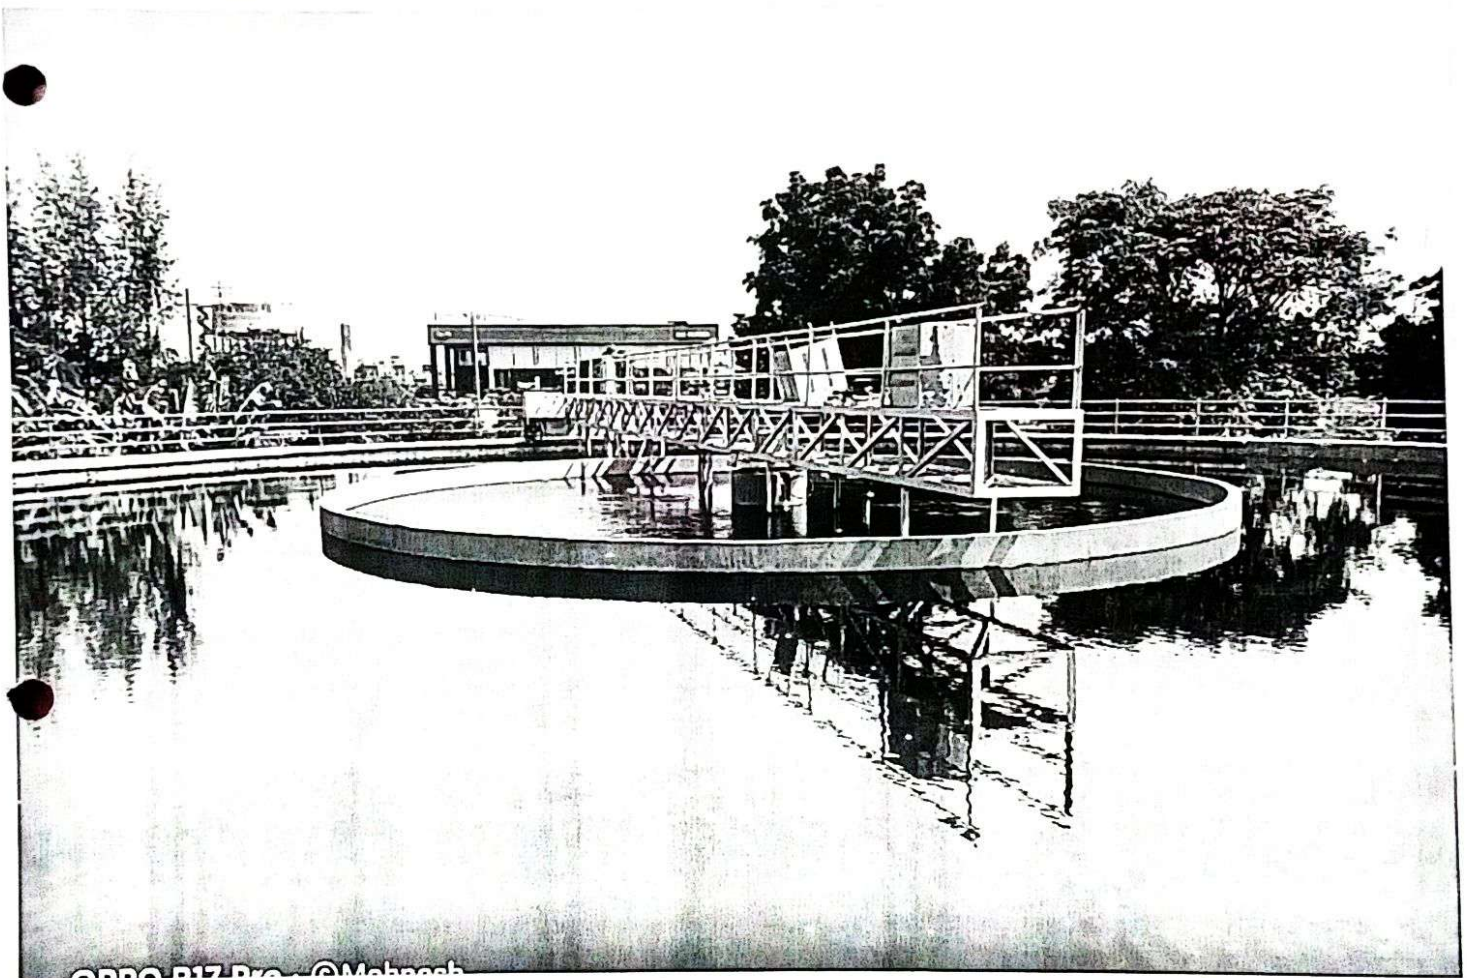

Mechanical
Dept.

Conclusion:

In this experiment we understand the working of water treatment plant & its processes pump house working.

GHV India Construction Pvt. Ltd,
Ghogargaon, Ahmednagar.

**Subject -Regarding Permission to industrial visit at your Hot Mix Plant and Road
Construction Site.**

Respected Sir,

Shri. Chhatrapati Shivaji Maharaj College of Engineering, Ahmednagar is established in year 2011 by Ahmednagar Jilha Maratha Vidya Prasarak Samaj's, Ahmednagar. The college is approved by AICTE, New Delhi, Recognized by DTE, Mumbai and affiliated to University of Pune, Pune. The college runs four branches of engineering viz. Civil Engineering, Computer Engineering, E&TC Engineering and Mechanical Engineering

As per the curriculum of Savitribai Phule Pune University, a visit to Hot Mix Plant and Road Construction Site, under the subject of Transportation Engineering is mandatory for the student of final year Civil Engineering.

I kindly request you to permit our 76 final year Civil Engineering student for visit to your Hot Mix Plant and Road Construction Site. Our two staff members will also a company them. You are also requested to spare technical person to give information about Hot Mix Plant and Road Construction Site.

Your help in this regard is highly appreciated. Thanking you in anticipation.

Yours Faithfully

Dr. Kharde Y. R.

PURPOSE OF VISIT

Our main purpose for this visit was to give the practical knowledge about hot mix plant working , labrotary tests carried out at companys site, process of bitumen mix . By this visit students can be familiar with industrial environment and get knowledge of how large scale highway projects are carried out . Also in 7th semester subject like Transportation Engineering requires knowledge about how road construction , highway embankment process etc. are done properly , so it is very much convenient to see all the practical and components in real time work environment.

Detail Visit Report.

Date of Visit : Thursday , 12 Nov , 2022

Place of Visit : Bitumen Hot Mix Plant , GHV INDIA PRIVATE LTD,
Ahmednagar – Ghogargaon 4 lane highway project ,
Solapur Road , Ahmednagar

Address : Ahmednagar - Solapur Road , Rui Chattisi , Ahmednagar

Faculty Incharge : Prof. M. Athare And Prof . Pagare . S

Technical Expert : Er. Ravi Verma , Er. Audeshkumar Gupta , Er. Muhammad Nadeem ,
Er . Rajshekhar Reddy

A) Introduction :

The aim at ongoing construction site visit was to make students aware of practical and field aspects of highway designing and detailing of various structural elements. The site named as "Ahmednagar – Ghogargaon 4 lane Highway project " situated at old running solapur highway , Rui Chattisi , Ahmednagar taken as a site of visit with the reason of having ongoing working of bitumen plant and Labrotary work of viscocity test, marshall stability test and test that must be required for bitumen mix before it application on highway. The labrotary test was in progress during site visit.

Details of Study at Site:

This site visit is organized on 12 Nov 2022. Before we went for the site visit, our lecturers gave us a brief information about the safety precautions that we should be alert of we enter the bitumen plant site. On the day we visit, we gather at college at 10.00 am for travelling by bus to reach the project construction site at 12.00 pm. This construction site was near Rui Chattisi villege, Solapur Road.

During the site visit we have been observed various types of tests are carried out to test bitumen mix sample and aggregates as per NHA standards. Er. Ravi Verma Explained us about various test as follows.

Testing perform on the Bitumen and Aggregate in the testing lab

1. Ductility test
2. Stripping value test
3. Presentation test
4. Flash and fire point test
5. Specific gravity of aggregate
6. Aggregate crushing value
7. Aggregate impact value
8. Marshall stability test
9. Shape Test

Such a various tests are performs on bitumen and aggregates.

1. MARSHALL STABILITY TEST :

Er. Ravi Verma explained us about very important marshall stability test which is carried on bitumen mix round block. He told us this test is also known as **flow test for bitumen**.

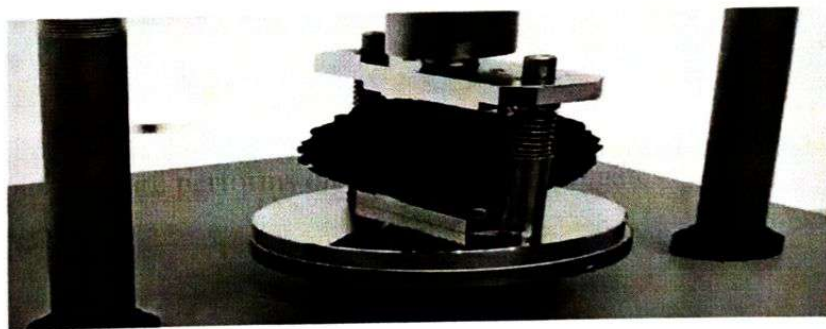

Fig : bitumen specimen in marshall stability apparatus mold

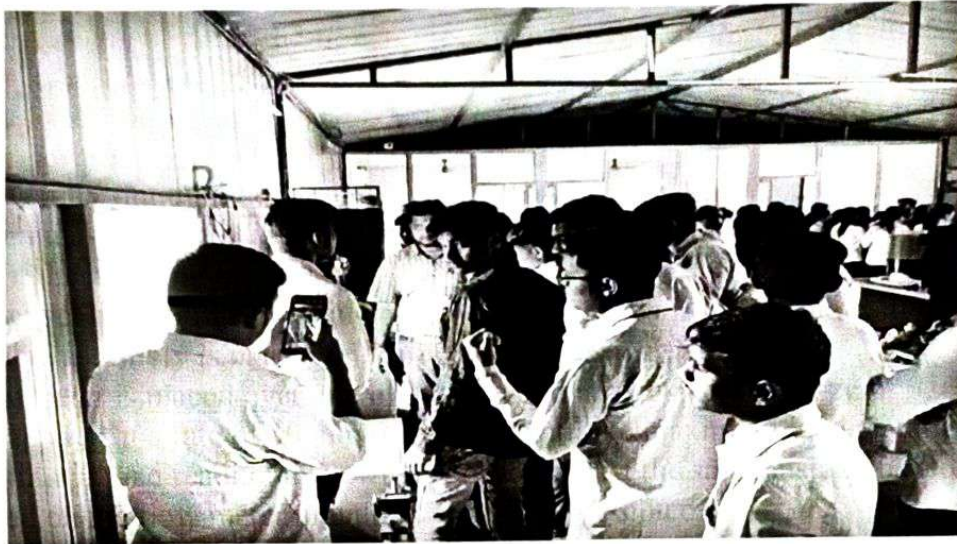

Sir told that stability of the mix is defined as a maximum load carried by a compacted specimen at a standard test temperature of 60°C. The flow is measured as the deformation in units of 0.25 mm between load and maximum load carried by the specimen during stability test (flow value may also be measured by deformation units of 0.1 mm)

TEST PROCEDURE :

1. Specimens are heated to 60 + either in a water bath for 30-40 minutes

or in an oven for minimum of 2 hours.

2. The specimens are removed from the water bath or oven and place in lower segment of the breaking head.
3. The upper segment of the breaking head of the specimen is placed in position and the complete assembly is placed in position on the testing machine.
4. The flow meter is placed over one of the post and is adjusted to read zero.
5. Load is applied at a rate of 50 mm per minute until the maximum load reading is obtained.
6. The maximum load reading in Newton is observed. At the same instant the flow as recorded on the flow meter in units of mm was also noted

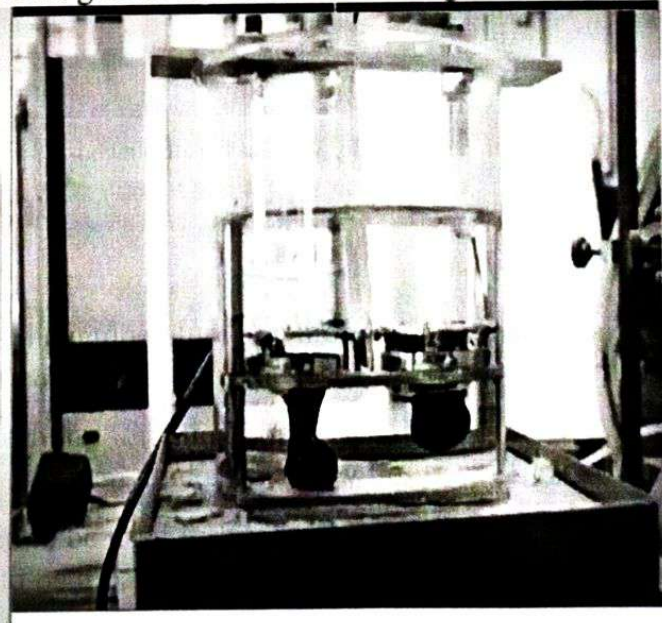

Verma sir shown marshall stability apparatus and its working

2. SOFTNING TEST :

The softening point test is the temperature at which the substance attains particular degree of softening under the specified conditions of the test.

The apparatus used to determine softening point of bitumen is RING AND BALL assembly. The softening point of various bitumen grades generally lies between 35°C to 70°C.

Softening point of bitumen to be used for road construction at a place where the maximum temperature is 40°C should be greater than the 40°C.s Ring and Ball test .

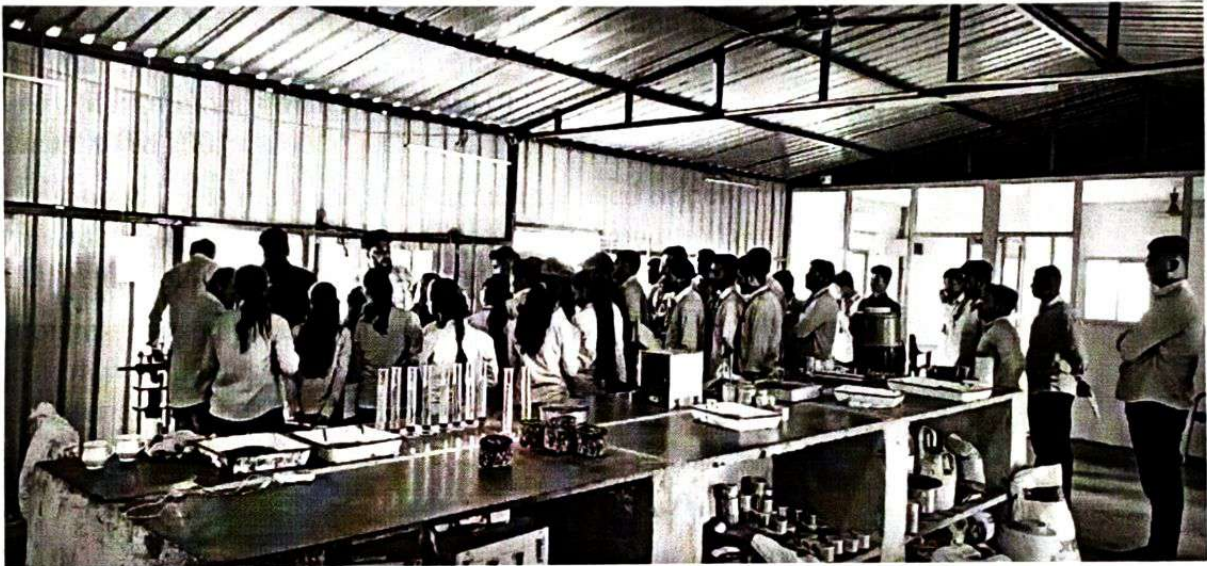

3. PENETRATION TEST :

Er. Mohammad Nadeem sir told us about penetration test to find penetration consistency value of bitumen sample . Penetration value test on bitumen is a measure of hardness or consistency of bituminous material. A 80/100 grade bitumen indicates that its penetration value lies between 80 & 100.

Penetration value is the vertical distance traversed or penetrated by the point of a standard needle into the bituminous material under specific conditions of load, time and temperature. This distance is measured in one tenths of a millimeter.

Penetration test is used for evaluating consistency of bitumen. It is not regarded as suitable for use in connection with the testing of road tar because of the high surface tension exhibited by these materials

Er. Muhammad nadeem sir explaining about penetration test

4. Compressive Strength Value Test :

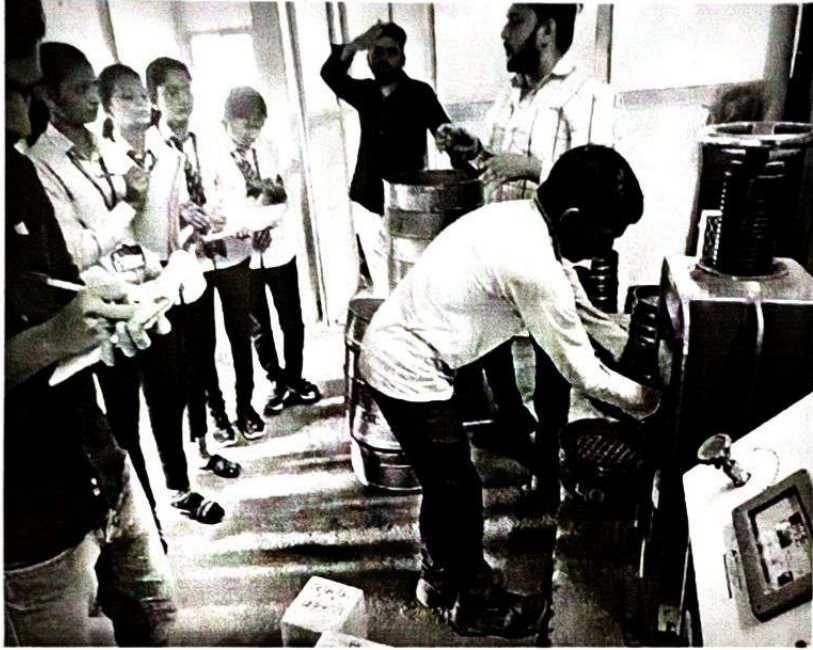

It is one of the most common test which is necessary and carried out on regular basis . in every labrotary . In this lab , M50 grade of concrete blocks were made at rmc plant lab and get strength check after dipped in the water tank for 3 , 7, 28 days .

In their lab , they have apparatus of Compressive testing machine .

Er. Ravi Verma and Er. Audeshkumar Gupta told us about the complete process of compressive strength test machine as follow .

1. For cube test two types of specimens either cubes of 15cm X 15cm X 15cm or 10cm X 10cm x 10cm depending upon the size of aggregate are used. For most of the works cubical molds of size 15cm x 15cm x 15cm are commonly used.
2. This concrete is poured in the mold and appropriately tempered so as not to have any voids.
3. After 24 hours, molds are removed, and test specimens are put in water for curing. The top surface of these specimen should be made even and smooth.
4. This is done by placing cement paste and spreading smoothly on the whole area of the specimen.

5. These specimens are tested by compression testing machine after seven days curing or 28 days curing.
6. Load should be applied gradually at the rate of 140 kg/cm^2 per minute till the Specimens fails. Load at the failure divided by area of specimen gives the compressive strength of concrete.

(1)

(2)

Image : compressive strength test apparatus explained by Er. Ravi verma and Er. Mohammed Nadeem

4. Flash and Fire Point Test :

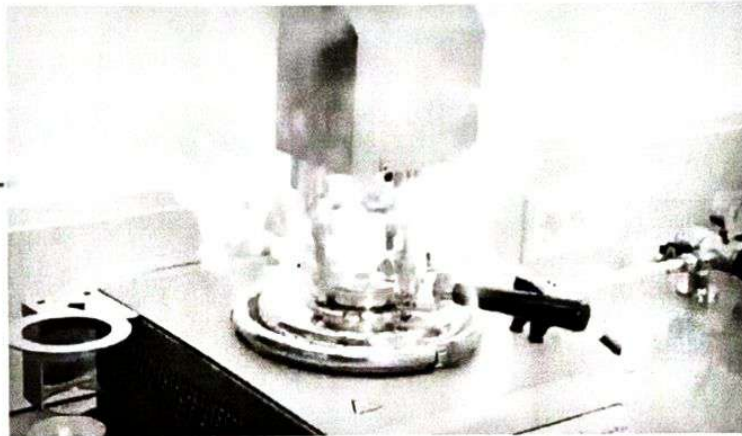

fig: flash and fire point test at lab

Flash and Fire point test is one of the most important test in bitumen sample testings

PROCEDURE :

1. It is conducted to know the safe mixing and application temperature values .

Heat the bitumen to above its softening point generally 75°C to 100°C and stir this softened bitumen thoroughly to remove air bubbles.

2. Fill the cup with softened bitumen up to the filling mark provided on the cup.

Now place the lid and close the cup. Other accessories like thermometer and flame exposure are suitably fixed in their respective positions.

Now lit up the flame and set the size of flame to 4mm in diameter.

3. The bitumen getting heated and preferred rate of heating should be 5°C to 6°C per minute. Stirring of sample should be simultaneously done along with heating using stirrer device.

4. The rate of stirring should be approximately 60 revolutions per minute.

Observe the thermometer carefully and when the temperature is 17°C below the actual flash point (175°C) lit up the test flame.

The test flame size should be of 4mm diameter and carry it close to the heating sample.

5. Apply the test flame for every 1°C rise from this point and remember during application of test flame the stirring should be stopped.

image : Flash and fire Point test practical

HOT MIX BITUMEN PLANT VISIT:

After the wonderful labrotary visit , Er. Nadeem and Er. Verma sir decided to show us the most important bitumen hot mix plant. It was very much special as we aspected .

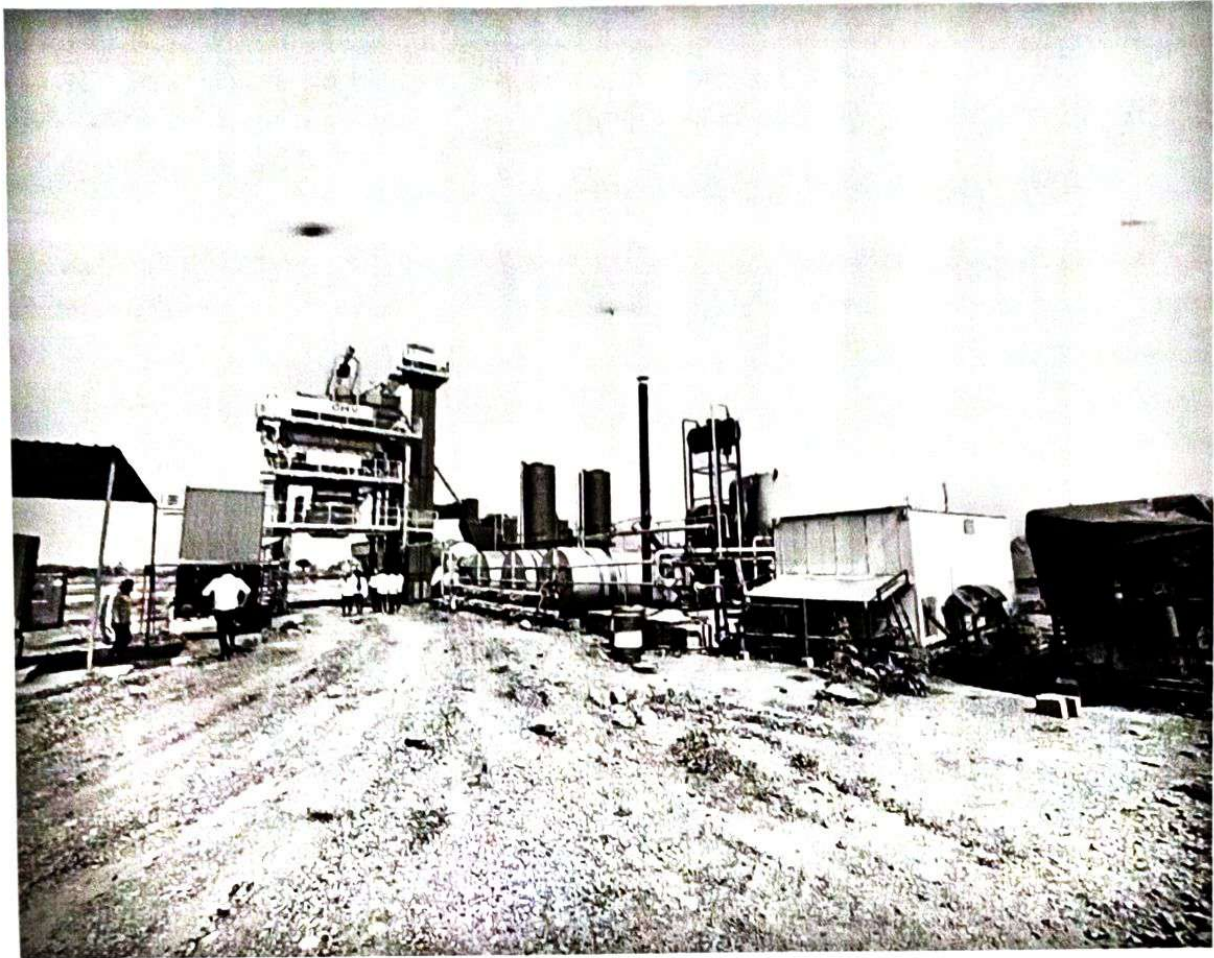

Image : GHV india private limited , bitumen hot mix plant

OPERATIONS AT BITUMEN PLANT :

The capacity of the hot mix plant is 170 to 200 tones per hour . Bitumen does get coated with aggregates until the it is heated . In the hot mix plant 4 tanks are provided for the storage of the bitumen.

There are 2 types if heating the mix : A) by using coal
B) by using Diesel

In this plant coal is used. The coal is getting pulverized and sends it towards the mix of aggregate stock, 10mm, 20mm, 40mm aggregate are used as per requirement.

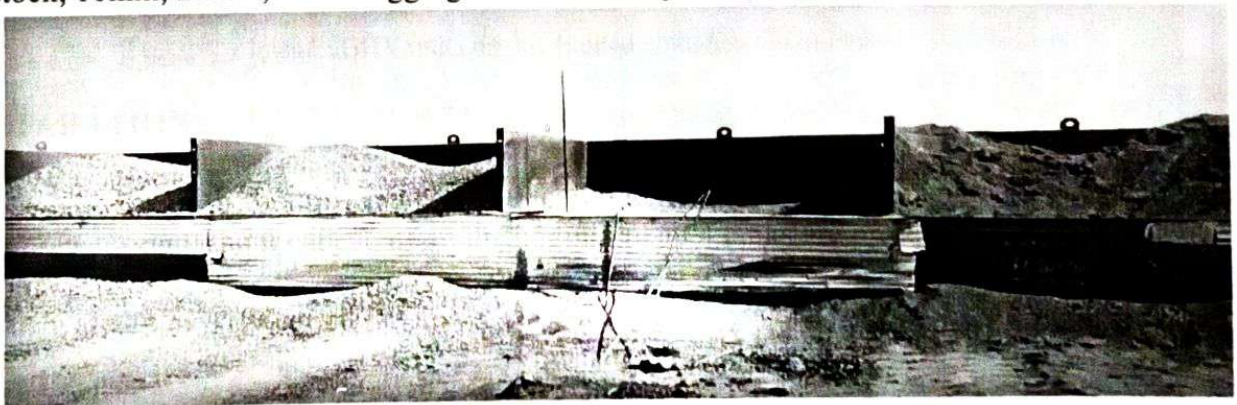

image : mechanisum of aggregate sieve sizes (as per requirement of bituen mix)

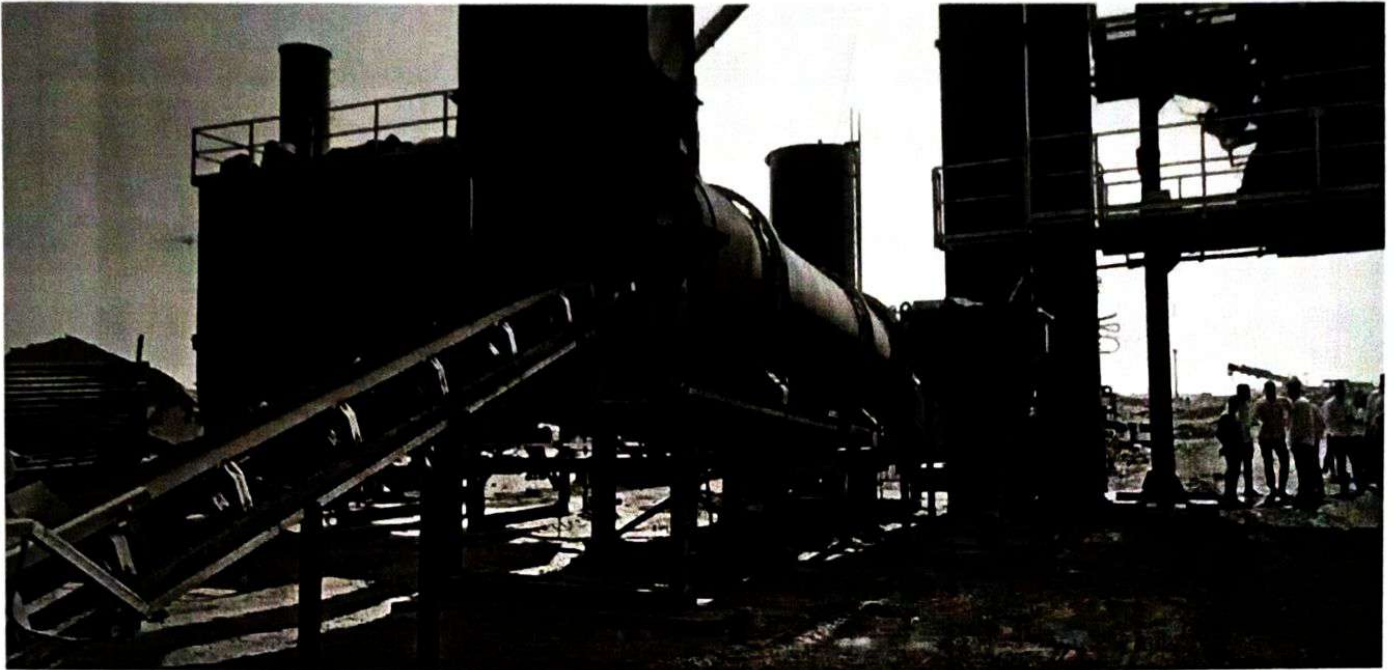

Image : aggregate conveyor belt attached to aggregate heat treat machine

In this rectangular column,

heat is provided by pulverized coal towards burner through pipes. Which is then heated by flumes goes in dryer. In that rectangular column rotator screens are provides for heating of aggregate. The heated aggregate get cleaned and comes in downward hopper. Below which the aggregate get mixed with bitumen. Control panel is used for taking the accurate quantity of the materials.

Plant working :

Remaining bitumen is again reused because it is a non decomposable material. It cannot be it is as non plastic material. land o r water because it can contaminate them. So it is reused for the plant. The arrangement is provided that the bitumen directly goes in mixture. For softening of bitumen requires temperature of more than 160 °C. It is used in this plant for heating of bitumen. And for the aggregate 10-15°C more temperature is used for coating of mixture which is controlled by monitor. The remaining fines in this plant are in the form of fine aggregates or dust is used in the plant as filter for binding the mixture. It can also be used in the

Image : Er. Ravi verma explaining working of bitumen storing tanks having various temperatures.

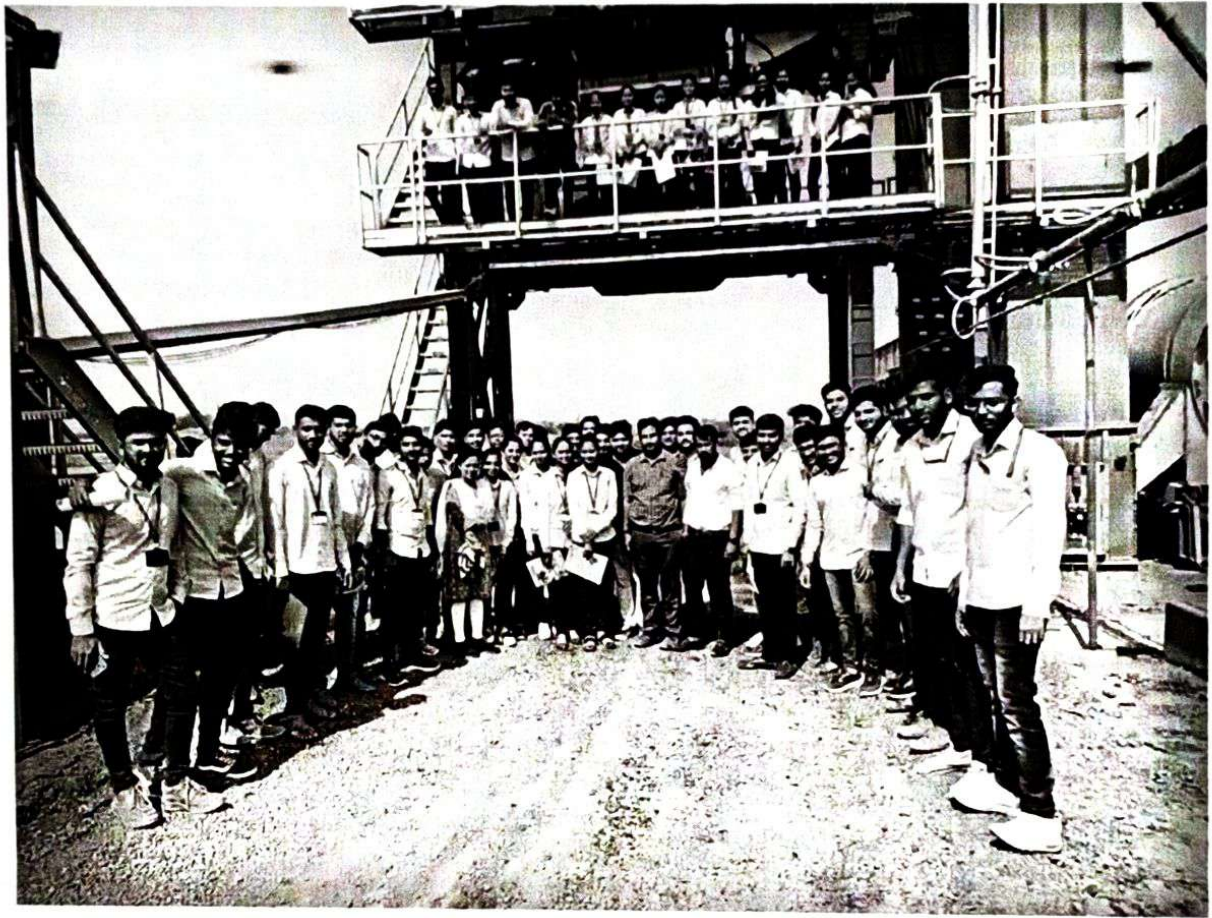

Image: Engineer sir explaining various considerations about bitumen plant.

Hot mix :

A mixture of asphalt binder and graded mineral aggregate, mixed at an elevated temperature and compacted to form a relatively dense pavement layer.

Group photo at HOT MIX PLANT of Site Visit :

Vehicles required for bitumen application on road site :

image: bitumen mix rippler and Road roller

Image: bitumen carrying vehicle - Truck

After seeing the amazing hot mix plant we saw company's own vehicles that use for Highway road construction .

Image : group photo at GHV india prt. Ltd . Base Office site

After all the visit end at 4.30 pm , it was important to falicitate the person made such a wonderful visit possible by his side .Our prof. athare sir thanked senior supervisor mr. shivaji rao bhosale sir for organizing such a great visit .

Summary

This visit helped UG students to enhance their collective theoretical and practical knowledge of industrial highway construction site. Students can understand detailed design of all components of road embankment and process which were covered in the subject of transportation engineering . They can identify their prospective study areas for their further study and research. Physical observation of various processes of construction will definitely be enhanced the skill and understanding of students in the field of highway engineering by bitumen application and got the knowledge about detailed process of civil construction.

Subject - Permission to visit at PEB Structures.

Respected Sir,

Shri. Chhatrapati Shivaji Maharaj College of Engineering, Ahmednagar is established in year 2011 by Ahmednagar Jilha Maratha Vidya Prasarak Samaj, Ahmednagar. The college is approved by AICTE, New Delhi, Recognized by DTE, Mumbai and affiliated to University of Pune, Pune. The college runs four branches of engineering viz. Civil Engineering, Computer Engineering, E&TC Engineering and Mechanical Engineering with intake of 60 students each.

As per the curriculum of Savitribai Phule Pune University, a visit to Structure likes Steel Column, Connections, Truss, Base Plate etc

I kindly request you to permit our 68 Third year Civil Engineering student for visit Ahmednagar Railway Station. Our two staff members will also accompany them. You are also requested to spare technical person to give information about Steel Structural Member (e.g. Beam, Column, Joints etc).

Your help in this regard is highly appreciated. Thanking you in anticipation.

Yours Truly,

Ahmednagar Jilha Maratha Vidya Prasarak Samaj's

Shri Chhatrapati Shivaji Maharaj College of Engineering, Nepti, Ahmednagar**VISIT REPORT****Department of civil Engineering****A.Y:- 2022-2023****Day & Date: - Wednesday, 09th Nov 2022****Visit to: - "Design of Steel Structure".****Visit at: - MIDC Ahmednagar.****Visit under Subject: -Design of Steel Structure.****Staff in Charge. - Prof. S. A. Jagtap, Prof. S. S. Pagare.,****Aim: -**

This visit is arranged, to give extra practical knowledge & to know more about the information of "Design of Steel Structure". Mr. Datta Shende, filter inspector & Mr. Sudhakar Pawar, Scada operator. Has given a deep knowledge of each unit of Truss, from aeration of water to portable water. He also told that Gantry Girder and type of connection is a multifaceted engineering discipline dealing with the design, construction, and operation of all types of filtration units. It encompasses a wide range of engineering disciplines, including civil engineering, computer engineering, electrical engineering, mechanical engineering, industrial engineering, and production engineering.

He has showed the various units of the Type of Steel Structures such as following-

1. Roof truss :-

A truss is a framed structure consisting of different members like a tie, principal rafter, strut, and slings, forming triangles i.e. a perfect frame. Used when the span is very large and the beam construction is not economical, the building is in an area of heavy rainfall.

The Span Of Roof Truss	= 15 m
Spacing Of Roof Truss	= 4 m
Rise Of Roof Truss	= 3 m
Height Of Roof Truss	= Above ground 20m
A.C Sheet	= 150 N/m ²
Weight Of Purlin	= 120 N/m ²
Total No. Of Panels	= 8 m
Openings Of Wall Area	= 10%
Life Of Roof Truss	= 25 years
Terrain Category	= 3 class (a)
Topographic Plan	= Horizontal and upwind slope < 3 ⁰

Fig: - Roof Truss. (Field House)

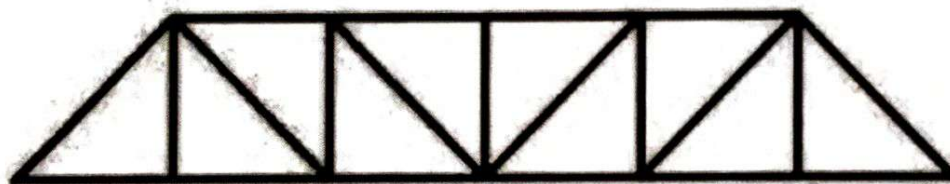

Types of Roof Truss Are As Follows: -

1. PRATT TRUSS :-

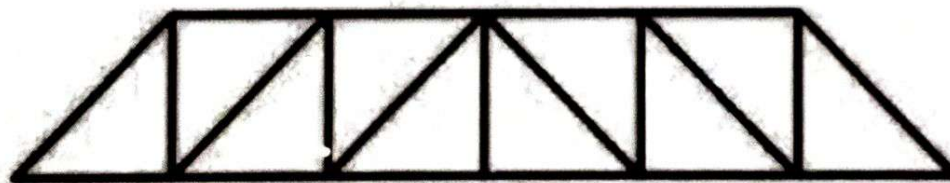

Pratt trusses are commonly used in long span buildings ranging from 20 to 100 m in span. In a conventional Pratt truss, diagonal members are in tension for gravity loads. This type of truss is used where gravity loads are predominant

2. HOWE TRUSS:-

The parallels in each chord are usually built up out of smaller beams, each small beam fastened to one another to create a continuous beam. In wooden Howe trusses, these slender beams are usually no more than 10 to 15 inches (250 to 380 mm) wide and 6 to 8 inches (150 to 200 mm) deep

PRATT TRUSS

HOWE TRUSS

3. BELGIAN TRUSS:-

Belgian truss used in supporting large sloping roofs; in the form of three isosceles triangles-one in the center with its base along the horizontal tie, and each of the outer two having its base along the sloping sides of an upper chord.

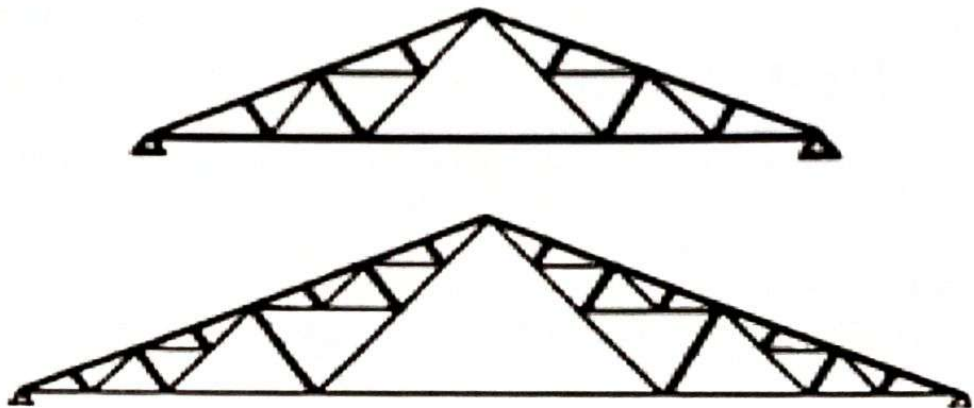

Fig: - Belgian truss.

4. FINK OR FRENCH TRUSS:-

The Fink truss is a commonly used truss in residential homes and bridge architecture.-It originated as a bridge truss although its current use in bridges is rare.

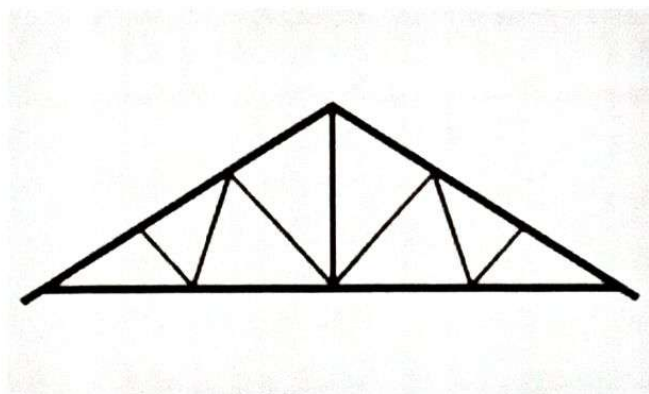

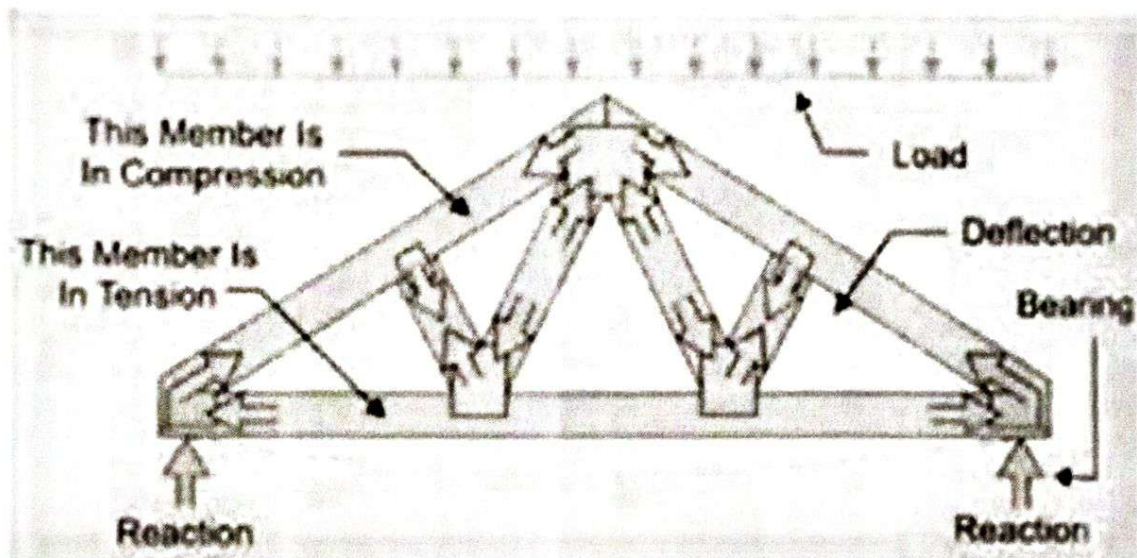

Fig: - Fink Truss.

Purpose of truss: -

A truss gives a stable form capable of supporting considerable external load over a large span with the component parts stressed primarily in axial tension or compression. The individual pieces intersect at truss joints, or panel points.

2. Gantry girder :-

Gantry Girders are provided in industrial buildings to support overhead cranes for the transportation and lifting of heavy load. These cranes may be manually (hand) operated overhead travelling cranes (MOT) or electrically operated overhead travelling (EOT) cranes.

Fig: - Gantry Girder.

Loading on gantry girder:-

1. Vertical load:-

It includes the self-weight of crane, self-weight of the crab and the crane capacity.

2. Lateral load:-

It is also called as surge loads. It may be caused by thrust due to sudden stopping of the crab and load when traversing the crab girder.

3. Longitudinal load:-

It is also called as drag load. It may be caused due to stopping and starting of the crane girder and produce thrust along the rails.

4. Impact load:-

These loads are occurred due to suddenly applied breaks, rapidly moving loaded cranes acceleration, retardation vibration, possible slip of slings etc.

3. Battens and lacing:-

Battens are plates or any other rolled section used to connect the main components of compression members. Battens should be placed opposite to each other on the two parallel faces of compression members. Number of battens in a column should be such that member is divided into not less than three bays.

Lacing consists of connecting the components of the column by a system of generally flat plates. (In some cases angles and channels are also used as lacings). Lacing plates may be 50 mm to 75 mm wide and 8 mm to 10 mm thick.

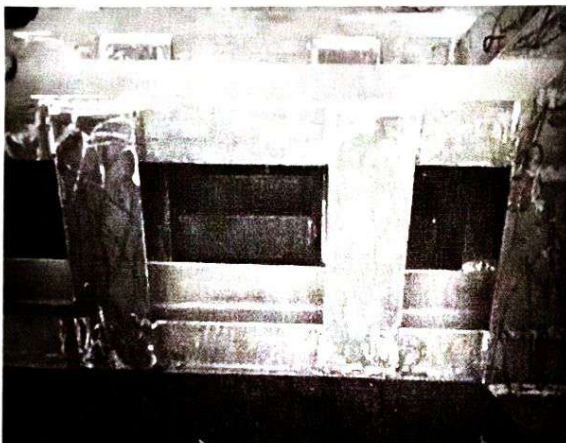

Fig: - Battens.

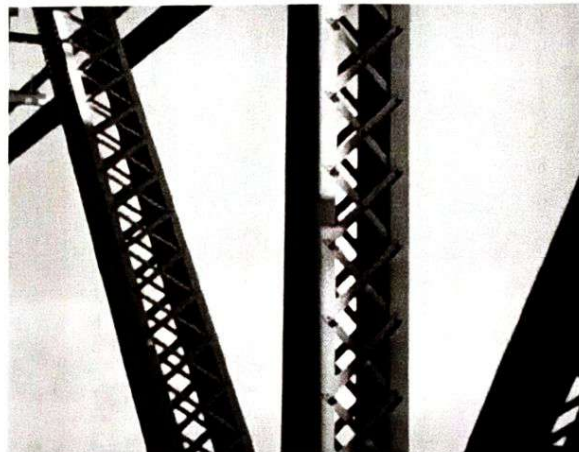

Fig: - Lacing

4. Types of connections:-

I. Bolted connections:-

Bolted connections are a type of structural joint used to join two or more structural components in a steel structure using bolts. Bolts are a form of threaded fasteners which has a male thread and performed matching female thread, such as nuts.

Fig: - Bolt Connection.

II. Welded connections:-

Welded connections are connections whose components are joined together primarily by welds. Welds can be classified according to: Types of welds: groove, fillet, plug, and slot welds. Positions of the welds: horizontal, vertical, overhead, and flat welds.

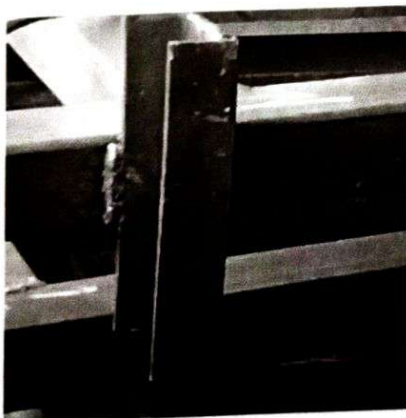

Fig: - Weld Connection.

Summary: -

After visiting the site, we fully understand the practical aspect of Design of truss & its units in comparison to theory aspect in book. The different types of method implemented on steel structure at units.

To,

**The Deputy Engineer,
E&M Sub Division
Water Treatment Plant,
MIDC, Ahmednagar.**

Subject – Regarding Permission to industrial visit at your Water Treatment Plant.

Respected Sir,

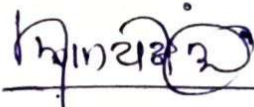

Shri. Chhatrapati Shivaji Maharaj College of Engineering, Ahmednagar is established in year 2011 by Ahmednagar Jilha Maratha Vidya Prasarak Samaj's, Ahmednagar. The college is approved by AICTE, New Delhi, Recognized by DTE, Mumbai and affiliated to University of Pune, Pune. The college runs four branches of engineering viz. Civil Engineering, Computer Engineering, E&TC Engineering and Mechanical Engineering.

As per the curriculum of Savitribai Phule Pune University, a visit to Water Treatment Plant site, under the subject of Water Supply Engineering is mandatory for the student of third year Civil Engineering.

I kindly request you to permit our 68 third year Civil Engineering student for visit to your Water Treatment Plant. Our two staff members will also accompany them. You are also requested to spare technical person to give information about Water Treatment Plant.

Your help in this regard is highly appreciated. Thanking you in anticipation.

NOTICE

All the Students are informed that Department is organizing visit of TE Civil Students to Water Treatment Plant, E&M Sub Division, MIDC, Ahmednagar on 9th November 2022.

In order to smooth conduction of visit, following committees are formed.

Sr No	Description of Work	Incharge
1	Discipline, Photographs & Reports	Prof. S. A. Jagtap
2	Letter of permission, Conduction & Overall Coordination	Prof. S. S. Pagare

And all respected subject teachers are directed to prepare visit report and feedback form for their subject visit. The Xerox copy of permission letters of industry should be submitted towards Prof. S. S. Pagare.

Visit Co-Ordinator
Prof. S. S. Pagare.

VISIT REPORT

Name: - DEHAREKAR SUMIT SUNIL

Class:-T.E Civil

Roll No:-23

Department of civil Engineering

A.Y:- 2022-2023

Day & Date: - Wednesday, 09th Nov 2022

Visit to: - "Water Treatment Plant".

Visit at: - Water Treatment Plant MIDC Ahmednagar.

Visit Under Subject: - Water Supply Engineering.

Staff In Charge.: - Prof. S. S. Pagare, Prof. S. A. Jagtap.

Aim: -

This visit is arranged, to give extra practical knowledge & to know more about the information of "water treatment plant". Mr. Datta Shende, filter inspector & Mr. Sudhakar Pawar, Scada operator. Has given a deep knowledge of each unit of water treatment plan, from aeration of water to portable water. He also told that water treatment plant is a multifaceted engineering discipline dealing with the design, construction, and operation of all types of filtration units. It encompasses a wide range of engineering disciplines, including civil engineering, computer engineering, electrical engineering, mechanical engineering, industrial engineering, and production engineering.

He has showed the various units of the water treatment plant such as following-

1. Aeration: -

Aeration is the process by which air is circulated through, mixed with or dissolved in a liquid or substance.

Aeration is used in liquid, soils and foods to improve quality and reduce

There are two types of aeration are as follows: -

A) Natural aeration (cascade type): -

This type of aerator work done naturally such as removing smells & dissolved oxygen from air. Water by gravity comes on the plant from intake well. Water can aerate in this aeration unit.

B) Artificial aeration (air diffusion type): -

This type of aerator get water by gravity same as above but the process of aeration is different. In this method perforated pipes are fixed in the tank & mixed air water due to upward moment of air remove CO₂, dirty smell and mixed oxygen.

Fig. Natural Aerators.

Fig. Artificial Aerators.

2. Flash mixtures: -

In the treatment plant raw water are having very low turbidity in all seasons. It is within the permissible limit that is >1 so they do not add coagulation water.

Fig. Flash Mixer

3. Clarifocculator (sedimentation): -

Sedimentation is the process of depositing sediment. It is a treatment process in which the velocity of the water is lowered below the suspension velocity and the suspended particles settle out of the water due to gravity, centrifugal acceleration or electromagnetism. We can see circular sedimentation tank. 3-4 retain water in this tank for setting the particles or sediments.

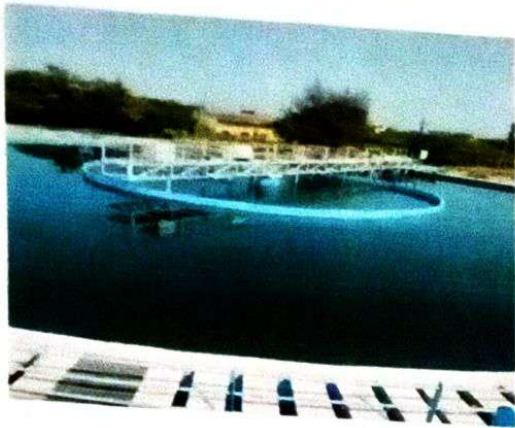

Fig. Clariflocculator.

4. Filtration: -

Filtrations any of various mechanical, physical or biological operations that separate solids from fluids (liquid or gases) by adding a medium through which only the fluid can pass. The fluid that passes through is called the filtrate.

We can see four-layer rapid sand filter bed such as follows: -

1. Gravel
2. Medium gravel.
3. Sand
4. Fine sand

These four layers are in this filter bed. this is rapid sand filter so they can do back washing 5-6 days or as per requirement. When water level can rise in the filtration unit i.e., rate of filtration can be slow then the can done back washing.

Fig. Rapid Sand Filtration Bed.

5. Disinfection (chlorination): -

It is the method of disinfection by which the micro-organisms are killed if chlorine & its components are used.

Generally, in raw water E- coil bacteria are found. Which is very harmful so disinfection is required. Disinfection unit having liquid chlorine tank. Chlorine added in water in pre-determination quantity. Chlorine reaction with water are as follows:

-

This hypochlorous is kill visible & non-visible bacteria. Then disinfection take place.

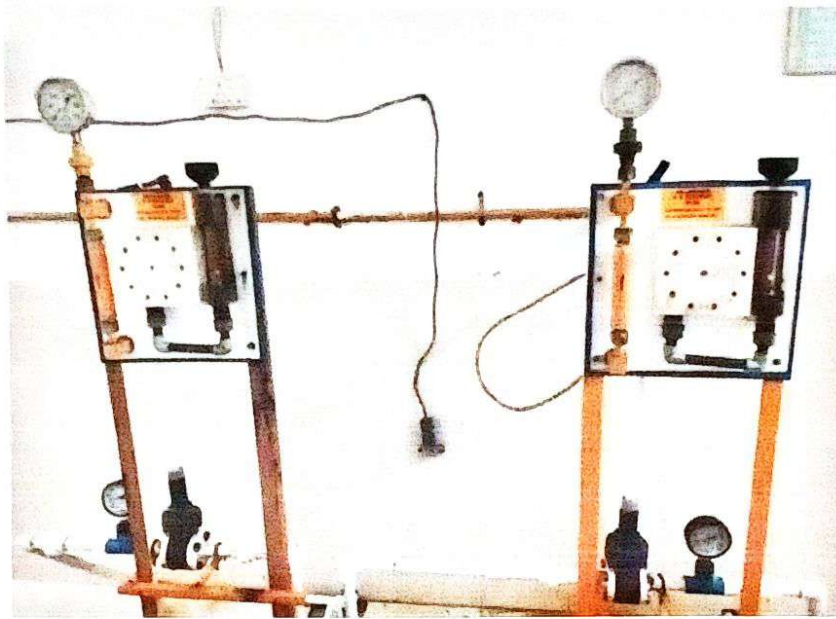

Fig. Chlorination Process Unit.

6. Underground storage tank: -

There are four large size underground storage tank. Then that treated water can store in underground storage tank.

7. Pumping house, elevated storage tank & distribution: -

Water which is store in underground storage tank that can be pumped in elevated storage tank.

There are two elevated storage tanks. they having capacity of 13,50,000 lit each.

Then water can be distributed from elevated storage tank by gravity to all city.

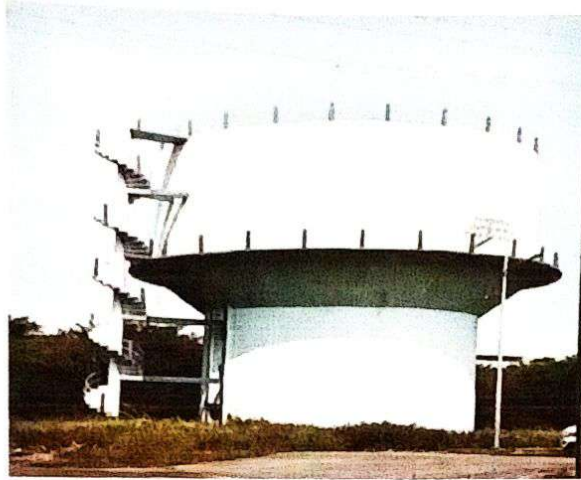

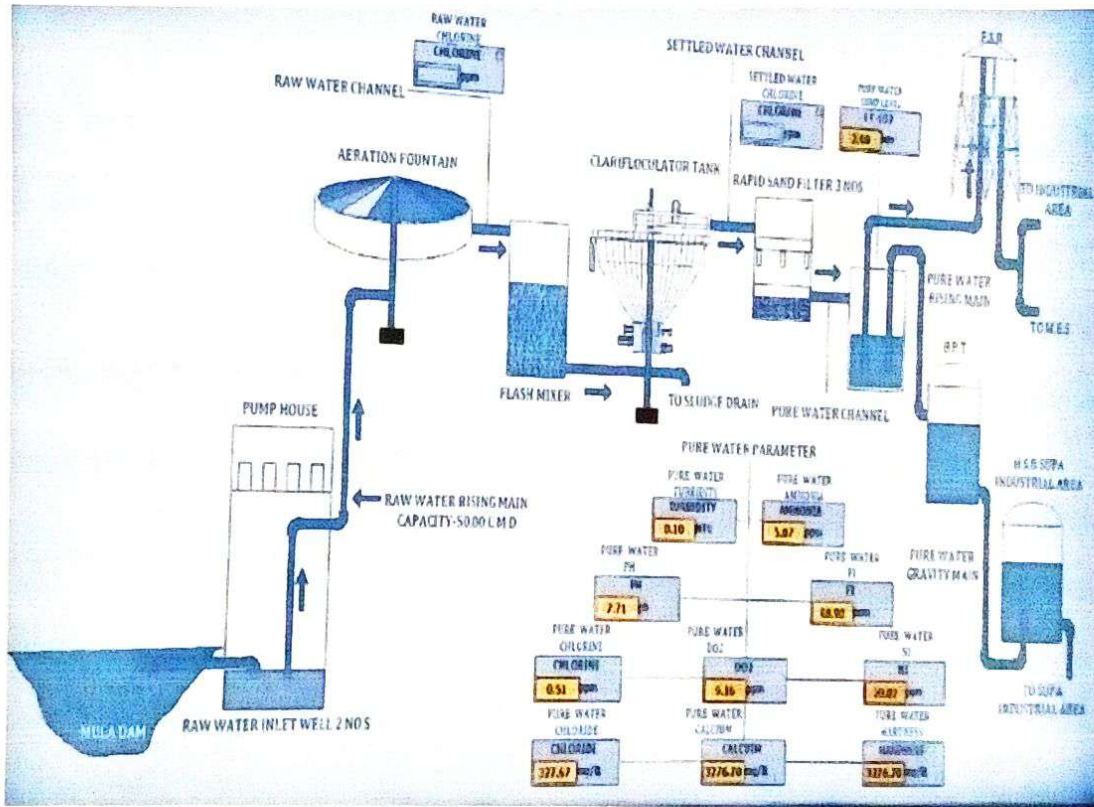

Fig. Elevated Storage Tank Of 13,50,000 Lit Capacity Each.

M.L.D.C. NAGAR WATER SUPPLY FLOW DIAGRAM

Summary: -

After visiting the site, we fully understand the practical aspect of water treatment plant & its units in comparison to theory aspect in book. The different types of method implemented on the plant at units.

Fig. (TE Civil) Group Photo At The Ahmednagar MIDC Water Treatment Plant.

Subject: Approval Letter for Industrial Visit

Dear Sir,

I am writing this letter to approve your request that you made on 18/10/2022 for visiting to our industry.

I am pleased that you are interested in visiting our industry. I would like to schedule a date 4th Nov 2022 and time 11:00 am for you.

I can assure you that our industry will give your student significant knowledge during this visit. I hope this visit will give your student to know things practically through interaction and working methods. It will lessen the gap between lessons and the practical working environment.

Thanking you,

Yours truly,

NOTICE

All the Students are informed that Department is organizing visit of BE Civil Students to Klassic Wheels Limited, Unit-III, Near Sahyadri Chowk, Manmad Road, MIDC, Ahmednagar, on 4th Nov 2022. All students have to report upto 9:45am at Sahyadri Chowk, MIDC, Ahmednagar. All students should be in proper uniform with ID card.

In order to smooth conduction of visit, following committees are formed.

Sr No	Description of Work	Incharge
1	Discipline & Photographs	Prof. M. S. Sarode
2	Letter of permission, Conduction, Overall Coordination & Reports	Prof. P. G. Nikam

And all respected subject teachers are directed to prepare visit report and feedback form for their subject visit. The Xerox copy of permission letters of industry should be submitted towards Mr. R. R. Dagdiya.

VISIT REPORT

ON

Industry with reference to Air Pollution Control Devices

Class : BE Civil

Department of Civil Engineering

A.Y. 2022-23

Date of Visit : Friday, 4th November 2022
Place of Visit : Klassic Wheels Ltd.
Address : E7&8, MIDC, Nagar-Manmad, Ahmednagar,
Maharashtra, India

Faculty Incharge : Prof. P. G. Nikam

Technical Expert : Mr. Tanvir Inamdar (Safety Manager)

A) Introduction :

We visited Klassic Wheels Ltd to understand the how the polluted Air is Treated in industry. Classic Wheels Ltd. is a global Automotive Steel & Alloy Rim Manufacturer Company located in Ahmednagar, MIDC. The company manufactures steel rims for 2-wheeler, 3 wheeler and 4 Wheeler and also wheels for 2-wheeler Vehicles.

Manufacturing Process:

In Company we observe manufacturing process which is as Follows :

1. PRESS SHOP

Photo 1 : Sheet Metal Pressing

2. RIM SHOP

Photo 2 : Wheel Rim Assembly lines

3. CED COATING

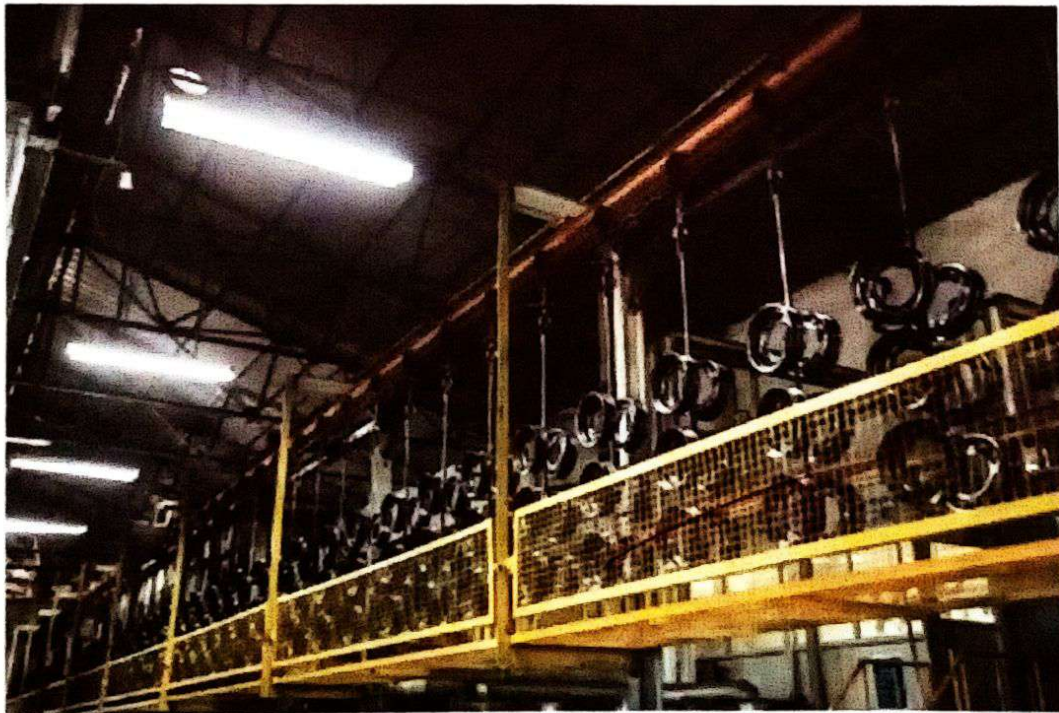

Photo 3 : CED Coating Lines

4. TOP COAT

Photo 4 : Top Coating Lines

5. CNC SHOP

Photo 5 : CNC Machining

6. DISPATCH

Photo 6 : Dispatch

Treatment on Polluted Air in Klasic Wheels :

The gases which are emitted after the melting of raw material Aluminum at 700 degree celcius. which is further get treated for controlling the air pollution. The gases are Hydrogen fluoride gases and particulates, fluorides, alumina, carbon monoxide, sulfur dioxide and volatile organics are produced. Due to that toxic gas their is need of treat that gas. For treatment wet Scrubber is used.

Wet Scrubber :

In wet scrubbing processes, liquid or solid particles are removed from a gas stream by transferring them to a liquid. The liquid most commonly used is water. A wet scrubber's particulate collection efficiency is directly related to the amount of energy expended in contacting the gas stream with the scrubber liquid. Most wet scrubbing systems operate with particulate collection efficiencies over 80-90 percent. Wet scrubbers can also be used to remove acid gas, however, this section addresses only wet scrubbers for control of particulate matter.

Meachanism :

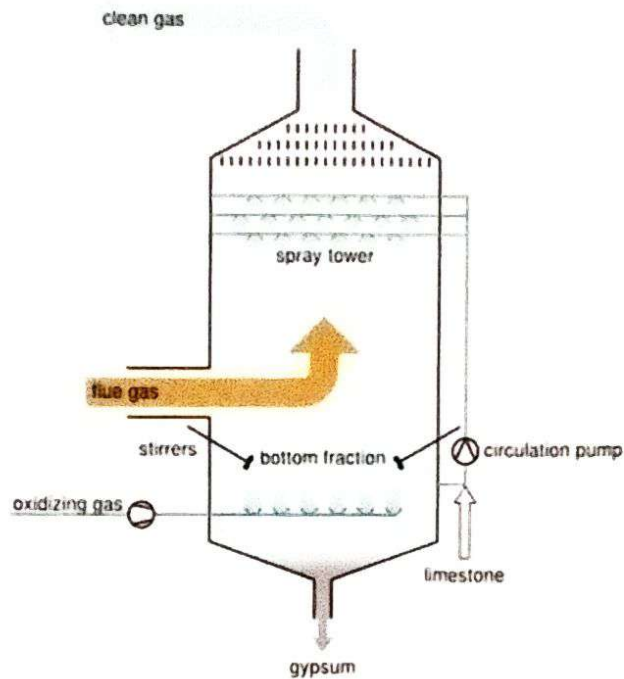

Fig 1 : Wet Scrubber Meachanism

All wet scrubber designs incorporate mist eliminators or entrainment separators to remove entrained droplets. The process of contacting the gas and liquid streams results in entrained droplets, which contain the contaminants or particulate matter. The most common mist eliminators are chevrons, mesh pads, and cyclones. Chevrons are simply zig-zag baffles that cause the gas stream to turn several times as it passes through the mist eliminator. The liquid droplets are collected on the blades of the chevron and drain back into the scrubber. Mesh pads are made from interlaced fibers that serve as the collection area. A cyclone is typically used for the small droplets generated in a venturi scrubber. The gas stream exiting the venturi enters the bottom of a vertical cylinder tangentially. The droplets are removed by centrifugal force as the gas stream spirals upward to the outlet.

Advantages and Disadvantages :

Some advantages of wet scrubbers over these devices are as follows:

- Wet scrubbers have the ability to handle high temperatures and moisture.
- In wet scrubbers, flue gases are cooled, resulting in smaller overall size of equipment.
- Wet scrubbers can remove both gases and particulate matter.
- Wet scrubbers can neutralize corrosive gases.

Some disadvantages of wet scrubbers include :

- Corrosion
- The need for entrainment separation or mist removal to obtain high efficiencies
- The need for treatment or reuse of spent liquid.

Subject: Request to arrange industrial visit.

Dear Sir / Mam,

We are pleased to Request you to arrange the industrial visit for SE and TE, BE computer engineering students. The tentative date for the industrial visit is 10/12/2022 to 20/12/2022. Your company's expertise and knowledge in the area would add a great value to the one and all, especially the budding engineers of the country who require the guidance and path-breaking ideas to lead their way through the tough competition in the Global market on this day.

With your company growth and in-depth knowledge in the area, you would be expected to deliver on the "Computer Network and Job Opportunities in TCS" as we are aware of your great contribution to this field of work. We look forward to your presence and guidance in making the event successful.

Hadapsar, Pune,

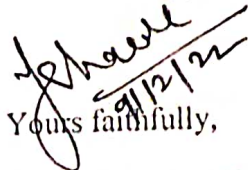

Maharashtra 411040

Dear Sir / Mam,

It was really a great privilege to have to visit at Digital Ion Zone TCS which was held at Digital Ion Zone TCS, Ramtekdi Industrial Area, Hadapsar, Pune, and Maharashtra 411040 on 13/12/2022. I would like to express my gratitude for your valuable Knowledge and presentation on "Computer Network Technology and Job Opportunities". Your valuable guidance had helped us in past and they would help us in future as well. On behalf of the all the faculties of the department, I greatly appreciate your work.

I hope for the same co-operation from you in near future course of the time.

Thanking you.

Yours faithfully,

Dr. Y. R. KHARDE

Industrial Visit Report to Digital Ion Zone TCS

Our Department had organized an Industrial Visit for the Students of Diploma & Degree of Computer Department to TCS along with 9 Staff Members (Prof.Y.A.Sisodia, Prof N.B.Gade,A.Adsure, Prof P.Faulsunder ,Prof R.Ghadage,Mr.jadhav A.,swapnil Satpute, Prof Walke S.)And 150 Students. The Visit was organized on 13/12/2022 at Digital Ion Zone TCS, Hadapsar, and Pune.

TCS iON Digital Exams Solution digitizes and automates end-to-end University and Board Examination Processes. It enables the secure creation and Distribution of Question Papers. The solution reduces administrative efforts and costs by automating processes such as Student registration, Exam center allocation, Hall Ticket issuance, Question Paper Logistics Planning, Exam-day Management, and Results Management.

Ion Digital Zone in Ramteki, Hadapsar, Pune is one of the leading Businesses in the Online Examination Centers, Computer Networking and Training Institutes.

The Industrial Visit was in Two Sessions:-

1. A Seminar was arranged in Two Sessions & the following Concepts were explained in brief.

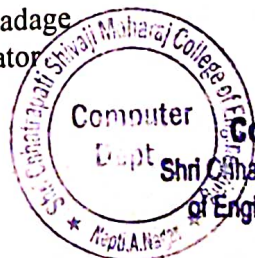

- Networking Systems, Types of Network & it's Topology
- Procedure for Candidate for Examination
- Switches & Routers
- Details of TCS's iON Operating System
- Latest Trends in I.T Sectors for Fresher's as a Job Profile

2.Students were divided in Sections to visit their Server Room and their different Examination Centres.

3.Outcome :-

- i. Student's Queries were solved
- ii. Students got an deep acquaintance of the real time processes in Industry.
- iii. Students were motivated to work in various Software Fields in Corporate.
- iv. Links will be sent to Register Students for making a Career in TCS.

Certificate by Industry

This is to certify that Mr. **KHEDKAR TEJAS DADASAHEB** of class **TE** of institute **SCSMCOE** Nepti, Ahmednagar has successfully completed internship of **18** days.

The internship period was from **24/04/2022** to **15/05/2023**.

(If applicable) The said students has also completed project work named **AutoCAD, ETABS, Staad PRO** during the said internship period.

Earthquake has also become one of the natural challenging factor for the efficient construction work. It is one of the dominant constrains while designing the frame building in the earthquake prone zone. Earthquake is a natural phenomenon as old as history of earth itself and is considered to be the most unpredictable one among all other natural disasters. Now a days, designers and engineers are giving more emphasis towards the earthquake resistance while analyzing and designing any structure to minimize the seismic impact.

Certificate by Industry

This is to certify that Mr. **GANDHI YASH DINESH** of class **TE** of institute **SCSMCOE** Nepti, Ahmednagar has successfully completed internship of **18** days.

The internship period was from **24/04/2022** to **15/05/2023**.

(If applicable) The said students has also completed project work named **AutoCAD, ETABS, Staad PRO** during the said internship period.

Earthquake has also become one of the natural challenging factor for the efficient construction work. It is one of the dominant constrains while designing the frame building in the earthquake prone zone. Earthquake is a natural phenomenon as old as history of earth itself and is considered to be the most unpredictable one among all other natural disasters. Now a days, designers and engineers are giving more emphasis towards the earthquake resistance while analyzing and designing any structure to minimize the seismic impact.
